Subject: RE: Meeting EUROFER on ETS proposal

Dear Adolfo

We have noted this, and will be back after the summer break.

Kind regards

Dear [REDACTED],

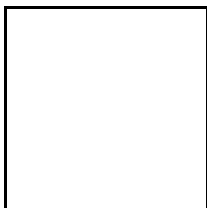

Thank you for taking the time to meet us this morning.

As mentioned, we would be grateful if you could give some explanation on the reduction of benchmarks assumed in the impact assessment (footnote 237 at page 176).

We would be interested to understand which data were used for calculating this assumption, as the assumed values are different for the different energy intensive sectors (footnotes at pages 176-178).

If that is possible, we look forward to your feedback (of course after the summer break).

Kind regards,
Adolfo

Dear Adolfo,

We have discussed your request, and although it is becoming quite tight here with upcoming summer holidays, we think a short meeting to clarify parts of the proposal is possible,

However, I would kindly ask your group to come here. Within limits, you can come as many as you like.

Next weeks the two possible days are Wednesday pm or Thursday.

Please let me know what suits you.

Kind regards

Subject: Meeting EUROFER on ETS proposal

Dear [REDACTED],

I hope this email finds you well.

As you might know, I have joined very recently the EUROFER team to work on climate and energy files, so we will continue staying in close contact.

Following the publication of the Commission yesterday, our members have requested to arrange a meeting with the European Commission to discuss some details of the proposal.

The objective of the meeting would have some clarification on few details of the proposal just to have a clear understanding of them.

If possible, we would like to arrange such meeting before the summer break, so we would like to ask whether you and/or a colleague of yours would be able to take part next week.

In order to allow a larger participation from our members, we would prefer having it at our offices, but if that is not possible we could also select a delegation depending on the capacity of your rooms.

I hope this is possible and look forward to your feedback.

Kind regards,
Adolfo
