Dear [REDACTED],

We would like to thank you for attending our event last week in Strasbourg where Ecofys presented the study on the assessment of the EU ETS post 2020 Commission proposal on the steel industry.

Please find in attachment the study as well as the presentation that was given in Strasbourg.

As mentioned on that occasion, it would be helpful to have the opportunity to discuss more in details the study in a meeting with representatives from Ecofys and few of our experts.

If you agree on that, could you please indicate few dates when you and members of your team would be available.

We also put in copy your colleagues from the relevant units in DG GROW so that they can be involved as well if possible.

Kind regards,
Adolfo
