Brussels, 22 November 2012

Dear Sir,

In the comments on the questions raised at the June 21 meeting of the Stakeholder Expert Group on the EU Air Policy Review, EUROPIA and CONCAWE indicated that CONCAWE would contribute to the process. Please find attached a paper elaborating on various sensitivities that merit consideration in the on-going Air Policy Review process.

As we have expressed before, EUROPIA and CONCAWE strongly believe in the need to complete a solid sensitivity analysis on the future scenarios that are under consideration. This should allow the development of robust policy that will address all aspects of sustainability at a predictable cost to all affected stakeholders. We believe the attached paper can make a valuable contribution to the Air Policy discussions and we therefore would be grateful if the paper could be made available to the Stakeholder Expert Group membership as part of the meeting documents for the December 5 meeting.

We remain at your disposal should you want any further clarification on the issues raised in attachment.

Sincerely yours,

EUROPIA

CONCAWE
