**Subject:** RE: Publication of rationales and list of substances to be screened in the IA on criteria to identify endocrine disruptors

Dear all,

As some of you wanted to know when the list and the rationales would be published, please note that this is now the case.

The following document has been published on this webpage:

[http://ec.europa.eu/health/endocrine\\_disruptors/impact\\_assessment/index\\_en.htm](http://ec.europa.eu/health/endocrine_disruptors/impact_assessment/index_en.htm)

Rationales and list  
 -FINAL VER...

Best,

---

Apologies to all: there was a problem with the sent document and it couldn't be opened.

You will find it attached again.

**Subject:** Publication of rationales and list of substances to be screened in the IA on criteria to identify endocrine disruptors

Dear all,

This is to inform you, that as agreed with the concerned DGs (ENV, GROW, JRC and SG) and also as communicated to the public during the 6<sup>th</sup> of November technical meeting on the JRC methodology, we will publish the rationales for selecting the substances to be screened in the context of the impact assessment, together with the list of substances.

The following document (rationales+list of substances : it is only one document so that the disclaimers always accompany the list of substances itself) will be published next Monday (7 December 2015) on the website dedicated to the impact assessment:

[http://ec.europa.eu/health/endocrine\\_disruptors/impact\\_assessment/index\\_en.htm](http://ec.europa.eu/health/endocrine_disruptors/impact_assessment/index_en.htm)

The paragraph on the water framework directive is still subject to potential changes.

Should you have any comments, please let us know by **Friday 4 December COB.**

Many thanks in advance.

Best regards,
