TEXT

SUBJECT: COARM: Demilitarization of EUCML controlled items

Following recent discussions over the revision of the Code of Conduct on Arms Exports, Greece would like to ask partners about their views and national practices regarding the demilitarization process of EUCML items.

More specifically, we would like to know when equipment listed in the Common Military List can be considered demilitarized. Furthermore, if equipment that falls under the EUCML, once demilitarized, continues to be controlled when it comes to export procedures. For example, we would like to ask whether a demilitarized item requires the same review process by the national competent authorities prior to export approval, or it can be exported without authorization.
