Stakeholder(s)	ACEA
Representative(s) of stakeholder(s)	[REDACTED]
DG GROW representatives	[REDACTED], [REDACTED] [REDACTED]

Summary of meeting

Meeting with [REDACTED]; discussion with the ACEA RMI Expert Group by teleconference.

The purpose of the meeting was for ACEA to obtain clarification on several issues related to the new type-approval Regulation and to access to vehicle RMI:

- As regards the proposal for a Regulation on type-approval, ACEA expressed its concern regarding Article 69, which would give any type approval authority (TAA) the right to check a manufacturer's compliance with the rules on access to RMI, without providing for a procedure in case of conflict between TAAs.
- Also on the new Type-approval Regulation, ACEA was interested in the application of the provisions on RMI to all categories of vehicles (including, for example, trailers) that is now foreseen in the text of the proposal.
- With respect to the incorporation of the ISO standards and the SERMI scheme in Regulation 692/2008, ACEA is concerned about the implementation time. ACEA explained the technical difficulties OEMs will face when implementing the ISO Standards on access to vehicle RMI and the SERMI scheme.
