DG GROW representatives	[REDACTED], [REDACTED]
Representatives of other DGs	-

Summary of meeting

Meeting at the request of ACEA. The topics discussed included review of the latest regulatory advancements in the area of:

- GSR
- eCall
- new Framework Regulation
- Lessons learned and what to do better for the New Framework Regulation

ACEA WG members presented their general and well as specific observations on the three files.

Regarding e-call, suggestions focused on possible future amendments to the recently adopted implementing/delegated acts.

On GSR, main observations related to organisation of the process of adoption of the future legislation, inclusion of all stakeholders in the consultation process, quality of the upcoming impact assessment, right balance between costs and benefits of the envisaged measures.

Regarding Type Approval framework, ACEA presented their views regarding specific solutions proposed in the draft regulation, i.a. limited validity of type approval, financing structure for the future type approval and market surveillance activities, proportionality of the restrictive measures in case of violation of the rules.

Commission services took note of the expressed concerns and will examine the validity of the observations made.
