Summary of meeting

ACEA representatives presented the association's position on the ISO Standards on access to vehicle RMI, the SERMI scheme and the consolidation of the existing provisions on access to vehicle RMI in the Euro 5/Euro 6 Regulations into the new type-approval Regulation.

Their concerns are related mainly to the time needed by the industry to implement the RMI Standards and SERMI after the entry into force of the amended legislation introducing these new items.

The Commission services took note of their concerns and agreed to organize a trilateral meeting with representatives of the independent automotive aftermarket sector in order to find a solution that is positive for the main stakeholders involved.
