Stakeholder(s)	ACEA
Representative(s) of stakeholder(s)	Erik Jonnaert, [REDACTED]
DG GROW representatives	G. Cozigou, [REDACTED]
Representatives of other DGs	-

Summary of meeting

1. RDE 3/WLTP

ACEA expressed a concern about the timeline and implementation of RDE3 proposal (including the overlap with the WLTP dates) and on the burden for industry due to increased number of type approval dates with different requirements. GROW replied that solutions are under discussions internally, but for the moment there is nothing concrete to share.

ACEA also asked for an update on the issues of cold start, PN, fuel quality and Light Commercial Vehicles in RDE 3. DG-GROW repeated what was discussed during the last working group of RDE-LDV.

Finally ACEA raised concerns on whether TAAs will be ready to issue WLTP Type Approvals, since they do not have the new CoCs ready yet. The issue will be raised at TCMV.

2. Motor Vehicles Emissions Group

ACEA requested to reinstate the MVEG as a useful forum for discussion on the emission files between all stakeholders.

3. Other issues

ACEA informed GROW on the demonstration project on connected vehicles that is planned to take off in 2017 to 2019, with a second phase based on 5G communications to start in 2019. The project plans to put together existing projects and new under a common umbrella of ERTICO. Chef de file is DG-CNECT.
