Subject: AW: Possible meeting on boric acid

Dear I ,

Thank you again for your e-mail. Please find enclosed the literature review on borates commissioned by ZVO. We hope you find the results useful. The original report was written in German and since some of your colleagues read German we have so far not ordered an English translation. Should you consider an English translation necessary, please let us know and we can organize this as well.

Moreover, ZVO is planning to attend a breakfast meeting in the EP on initiation by _____ on 17 November. Should there be any questions with regard to the review, please let me know and we could organize a quick informal get-together.

Kind regards,
