**Subject:** Database of European ABS Issuance Data and Documentation

Dear Lord Hill,

With regard to the European Commission and ESMA's construction of a website and database for European ABS/Structured Finance Issuance:-

My business, EuroABS Limited (an entirely UK based company), has the most comprehensive database of these data available. We can provide the EC and ESMA with access to this data set free of charge provided any public use cites EuroABS as the source.

We have a complete database of European ABS issuance from 1<sup>st</sup> January 1995. All publicly available data, documentation and reports, available to and used by all ABS industry professionals via our website at <http://www.euroabs.com>. We provide the data source of choice for most European ABS/Securitisation professionals, including, for instance, the European Datawarehouse. Our web platform and database has been live since July 2000.

Please let me know if my offer is of interest to you.

I'm unsure as to exactly who within the European Commission structure and ESAs this would be most relevant to so I have copied in various people with whom I have had previous communication and dealings on related matters. I would be most grateful if you could please forward on to the most relevant parties and ask them to please get back in touch with me.

Thank you and regards,

<http://www.euroabs.com>
