Subject: Comments on biofuels - segnalazioni per la revisione dei valori di default della RED

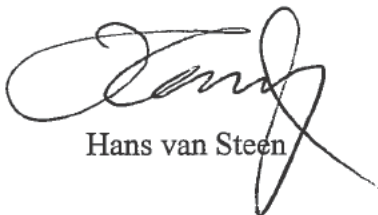

Dear [REDACTED],

Thank you for your letter of 9th April addressed to Ms Battista in the cabinet of Mr Oettinger. Please accept my apologies for the late answer.

Your findings are indeed interesting, and we have therefore forwarded your letter with annexes to our scientific experts at the Joint Research Centre in Ispra, so that they can take your findings into consideration when they calculate new default values. We aim at introducing updated and new default values later this year, if possible.

Thanks again for your important contributions to increase the accuracy of our default values.

Yours sincerely

Hans van Steen
