Dear [REDACTED],

thanks for your email and proposal to discuss technical issues. May 14 would work for me. We have to check who else from Cefic and affiliates can join.

Regards,
JF Krueger

Dear Dr. Krueger,

First of all thank you very much for this very informative set of data, which is much in line with our discussions in March.

These days we have as well some internal discussions on methodological questions with colleagues from other sectors. I would suggest to have afterwards a small technical meeting on the statistics to discuss remaining questions of understanding on our side and potentially further steps.

It will not be easy to find a suitable date because of numerous holidays in the next few weeks. Tentatively I would propose 14 or 15 May. Could you please tell me whether this would be convenient?

With best regards

[REDACTED]

Subject: Energy Intensive Industries - Task Force EII - Submission of the European Chemical Industry

Dear all,

Friday April 18, 2008, Cefic distributed an Executive Summary, a spreadsheet with data and a comprehensive presentation concerning the task force EII. This was based on a joint meeting of DG ENTR and the European Chemical Industry to demonstrate that the European Chemical Industry is

1. an Energy Intensive Industry,
2. exposed to international competition, and
3. that carbon leakage for this industry is a given risk.

Please see attached an updated submission of the European Chemical Industry to prove the case. You find attached an Executive Summary and a comprehensive presentation including annexes and data sheets.

Please feel free to direct any further questions to Cefic. We appreciate to cooperate with your service on this important task and will support your work with additional material and data, once available.

Best regards,
Joachim Krueger
