Subject: RE: AW: My presentation

Dear [REDACTED] and all,

Thanks so much for exchanging your PPTs.

Indeed, [REDACTED] called yesterday, and we agreed that the meeting in Wageningen was our "soil kick-off", and that only a short info to the consortium is sufficient at this point. The minutes will help us to inform also those colleagues not attending in Wageningen, but interested in soils.

I already started to have a short look at your draft report, [REDACTED], and will share my thoughts and suggestions later.

[REDACTED] also contacted me, and we talk tomorrow about revisiting the concept for soil degradation mapping.

Greetings,
[REDACTED]

Dear all

I think that the idea was that our meeting was the interaction on 1.8.2.1 and 1.8.2.2 and so there is no time slot assigned for it at the consortium meeting. I hope to send the minutes today or tomorrow (busy with teaching). Important is to come up with priorities and a related good approach for 1.8.2.2.

Best regards

Dear all,

thanks for all the input that have been shared in the last days.

I've been going through the agenda of the splinter sessions (01/02) of the consortium meeting and I realized that, at least in the version I have, there is not time slot assigned for 1.8.2.1 and 1.8.2.2.

For the ones who'll be in Copenhagen, is there a session planned for these tasks or any plan to meet beside the official schedule ?

Best Regards,

[REDACTED]

Dear [REDACTED],

Thank you for hosting a very fruitful meeting!

I would be very happy if you could circulate the paper you mentioned, in order to get a first impression if we can make use of it. I hope you find us sufficiently trustworthy. The paper could be helpful for the revision of the task description (1822) on which I need to start working as soon as possible.

Dear [REDACTED], I will call you on Monday (earlier is unfortunately not possible, since I am again on mission until then).

Best wishes!

[REDACTED]

Dear all

I wonder whether I have send the correct one (deleted it already) but I do not think so.
Please remove the old one and keep this one!!

Best regards
