

HLG on Fake News main and reserve lists

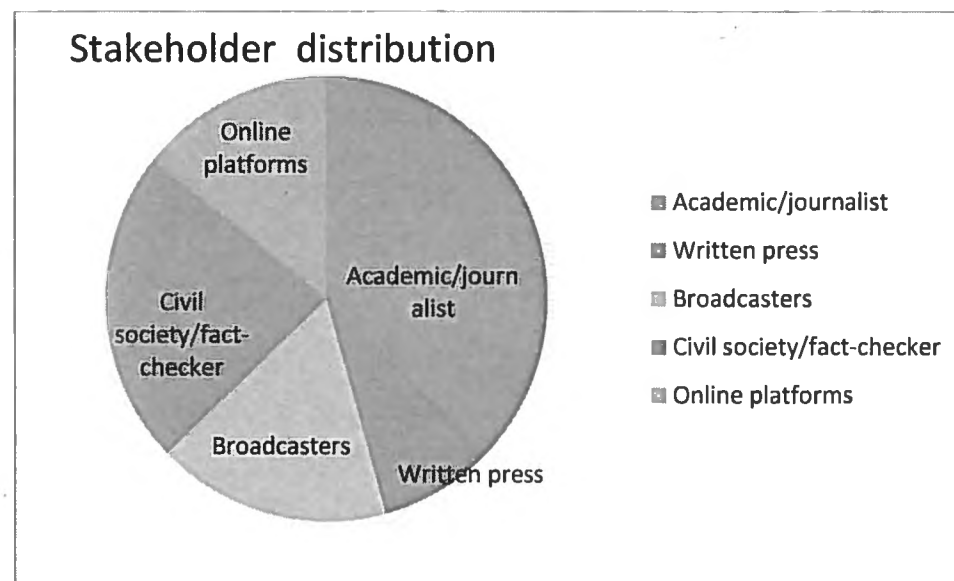

352 applications were received following the publication of the call for applications.

The selection criteria used to select the members of the High Level Group were the level and field of expertise and representativeness of the stakeholders, as specified in the Call for applications. Whilst the gender and geographical balance are a requirement only for the members applying in their personal capacity, the overall list is also well balanced as regards both criteria.

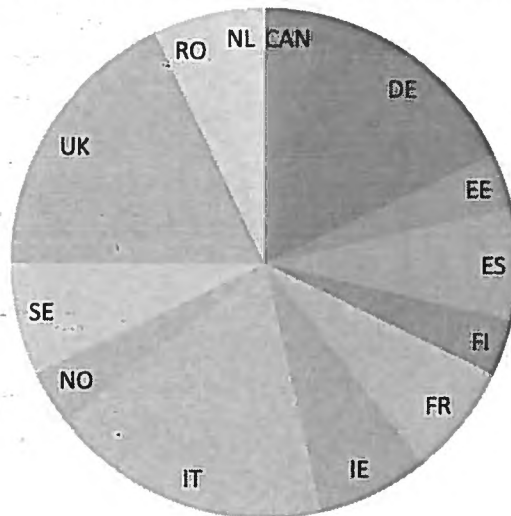

In the proposed list of 35 candidates, the gender balance is 60% men– 40% women. Representation is as follows: 13 individuals and journalists, 3 written press, 6 broadcasters, 8 civil society representatives, 5 platforms. There is a balanced geographical representation with most of EU countries represented, with US present for the platforms.

Regarding applications from academia and journalists, we have ensured a mix representation of computer scientists, lawyers, social and political scientists, and journalists.

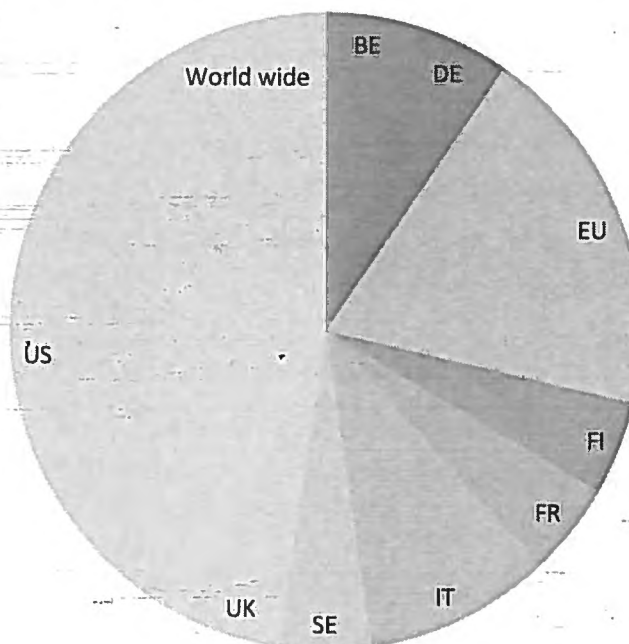

The reserve list contains 11 candidates.

Geographical distribution of HLG overall individuals (main list)

Geographical distribution of HLG companies/organizations (main list)
