Subject: Follow-up to the NSI West Gas Regional Group meeting of 15 February 2017

Attachments: Updated supervision strategy to RGs.pdf

Dear Members,

I would like to thank you for your constructive participation in the NSI West RG meeting held on 15 February.

In particular, I would like to thank promoters of the PCI candidates for their presentations and answers to all questions concerning their projects.

- Please note that the **presentation, including the slides presented by project promoters** was uploaded on CIRCA BC, folder North-South gas interconnections in Western Europe.
- You should have received an automatic notification about it generated by CIRCA BC. If you have not received such notification, after checking your spam folder, please contact me.
- Regarding the document "**The supervision strategy for the PCI implementation**" that was mentioned at the meeting, please note that its new version is attached to this mail and you can also find it on CIRCA BC, both in the North-South gas interconnections in Western Europe folder and in the "TEN-E Regional Group Meetings" folder (number 13, open to public).

The following changes have been made with regard the version discussed in September 2016 (and also posted on CircaBC):

- the document mentions that "*Regional Groups [...] will be asked to endorse this updated strategy in the upcoming meetings of February and March 2017*", and
- the Commission will keep a register of issues regarding the PCI monitoring that would be raised to the attention of individual Regional Groups.

We should be very grateful if you could send any comments and remarks you may have on this document by 28 February 2017 to the following mailbox: ENER-xxxxxxxxxxx@xx.xxxxxx.xx, subject matter "supervision strategy".

In case we do not receive any comments or objections to the document by that date we will consider it approved. We will regularly come back to the topics identified in the document in upcoming Regional Group meetings with a view of improving the monitoring of the implementation of PCIs.

Best,
