EDPS and F5 meeting - Follow up - Future cooperation

Dear all,

Following last week's meeting between EDPS and unit F5, please find below a summary of possible areas of future cooperation between both entities:

1. EDPS and unit F5 will keep inform mutually of their activities (i.e. by holding meetings twice a year)
2. EDPS will investigate current stakeholders in its area that might be interested in participating in the next call for proposals as partner within a consortium.
3. Unit F5 will inform the EDPS about its relevant research results (i.e. recommendations on data protection to policy makes of PrimeLife) and the EDPS will promote such results (i.e. by publishing such results in their website)
4. The EDPS will provide advice on the way to include data protection concerns in future F5's proposals and research activities.

Regarding the previous tasks [REDACTED] will be the EDPS contact point for F5 and [REDACTED] will be the unit F5's contact point for the EDPS.

Moreover, if you want to know more about our projects please find below the website:

http://cordis.europa.eu/fp7/ict/security/projects_en.html

This is a first draft, please let me know if you agree with the previous areas of cooperation.

We are looking forward to working together in the future.

Thanks a lot,

Kind regards,

[REDACTED]
