Joint recommendation for demersal fisheries in the North Sea Note on choke species

Dear Mr Aguiar Machado,

On behalf of the Scheveningen group, chaired in 2018 by Germany, I have the honour to transmit to you the joint recommendation of the Scheveningen group for a discard plan for demersal fisheries in the North Sea as from 1 January 2019. We remain available for any inquiry you may have in this regard.

Furthermore, referring to the Commission's note of 27 March 2018 – Ares(2018)1669795 – in which an updated list of possible concrete choke cases for the North Sea predicted for 2019 were requested, including concrete proposals as to how such choke situations could be avoided, I also transmit to you

- a note of the Scheveningen HLG to the Commission on choke species in the North Sea in the context of the full application of the landing obligation as from 1 January 2019, prepared in response to your letter of 27 March 2018;
- a paper on choke mitigation tools prepared end 2017 under the Dutch presidency of the Scheveningen group;
- a choke species analysis prepared under the German presidency (to be used in conjunction with the explanatory note).

These documents bear witness to the intensive work of the Scheveningen group to address choke species situations ahead of the full application of the landing obligation.

The Scheveningen group remains committed to further work to address outstanding issues related to the full implementation of the landing obligation which in our understanding is a permanent challenge.

Yours sincerely,

A solid grey rectangular box used to redact the signature of the sender.
