Subject: Nice to meet you at Digital Europe and pleasure to invite you to Huawei Cyber Security and Transparency Centre in Brussels

Dear Mr. Juhan,

Very nice to meet you at Digital Europe night event! Unfortunately, both of us run out business card, so I find you email address to contact and invite you.

In our continuous effort to demonstrate transparency, openness and cooperation we recently opened the Huawei Cyber Security and Transparency Centre in Brussels.

The Centre is a hub for Huawei to cooperate with the European ICT ecosystem by allowing information exchange on key issues such as standardization, certification, and security requirements, providing transparency on what we do and how we are doing it, in order to provide our contribution to the building of the Digital Single Market and the Security Union.

Our vision for cyber security is to bring digital to every person, home and organization for a fully connected, intelligent world. On this basis, our cyber security mission is to develop an effective cyber security approach through global cooperation in order to implement an end-to-end, customer-oriented, transparent, and trustworthy cyber security assurance system.

In order to demonstrate our commitment to cyber security, we would like to cordially invite you for a visit of our Huawei Cyber Security and Transparency Centre at a time of your convenience. If you want to know more details, we are glad to schedule a meeting with your.

I am looking forward to your reply.

Yours faithfully,
