

## 1. TEP composition<sup>1</sup>

On 30<sup>th</sup> April 2015, the TEP was composed exclusively of technical equipment owned by Member States and Schengen Associated Countries (MS/SAC).

The table below shows the composition of the TEP in April 2015. As mentioned in the TEP Monthly Reports for February and March 2015, Frontex, in close cooperation with the MS/SAC, has been revising and updating the OPERA database by removing or replacing those assets that were no longer available and which would never be deployed within Frontex joint operational activities. As a result of this exercise the equipment registered currently in the TEP more accurately reflects the resources available for deployment in Joint Operations.

OPV	CPV	CPB	FWA	Helicopters	TVV	Patrol cars	Handheld surveillance equipment	Equipment for border checks	Dog teams
30	62	247	39	50	31	89	148	202	28

The pie chart below shows the share of assets within the TEP in percentage by type of equipment.

<sup>1</sup> The information excerpt was made by OPERA on 30 April 2015.
