Subject: Meeting request - [redacted] EDF Group [redacted]

Dear Mr Samson,
Making Europe the first CO2-neutral continent by 2050 will require significant amounts of green and decarbonized electricity, the electrification of several sectors of the economy as well as the development of clean gases such as hydrogen.
As a leader in low carbon electricity with 90% of our activities based in Europe and 500 million euros/year of R&D to develop innovative solutions, EDF intends to put all of its efforts into the Green Deal in order to help meet these objectives.
[redacted] EDF Group [redacted], will be in Brussels on **26 February** and would be available in the morning until 1pm to discuss with you how EDF's strategy can best contribute to the modernization of the energy sector and to the decarbonisation of the European economy. I am conscious that this would fall on the day of the publication of the Climate Law and we remain available to explore other dates.
I remain available to answer any question that your team may have with regard EDF and this meeting request.
Thank you for your consideration.
Best regards,

[redacted]
