

Subject: [REDACTED] - BELARUS – Report on the visit of Commissioner [REDACTED] to Minsk

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

Detail

President

[REDACTED]

On nuclear safety, Commissioner said that EU and Belarus have a common agenda on this important question, given that new nuclear power plants (NPPs) were built not only in Belarus, but also in UK and HU. The EU would be interested in sharing new energy efficient technologies. AL underlined that BY wants to diversify its energy sources and reminded that NPP Ostrovets was built by Russia with Russian technology because other countries were not able or interested in cooperation with Belarus on the NPP. Belarus stands ready to cooperate on energy efficiency with the EU and is interested in German technology.
