Subject: Re: Eurostat's Data collection of weekly deaths

Dear members of Eurostat,

Thank you very much for your email.

In Spain, the definition of date of death used for data transmitted to Eurostat is by date of occurrence.

We take advantage to tell you that we have just sent new information about weekly deaths (from 2000 to 2020) today.

We have corrected some minor mistakes that we have detected and we have incorporated information about year 2020 (until week number 21).

If you have any question, please do not hesitate and contact us.

Kind regards,

S. G. de Estadísticas Sociodemográficas
Instituto Nacional de Estadística
Paseo de la Castellana, 183 - 28046 Madrid - España
