

BTO of a meeting with Eurometaux  
02/07/2020 per Skype

Participants :

Eurometaux: ( ), ( )  
( ), ( )  
SANTE E: ,

Eurometaux presented their view on the Chemical Strategy on Sustainability which is currently in development and expected to be adopted in September 2020. They outlined the importance of metals to achieve the objectives of the Green Deal and the digital transformation. They stressed the need to identify key circular value chains, which hazardous substances are used, where exposure happens and how to prevent it. They had already reached out to DG ENV and GROW who are the lead DGs for the strategy. They announced their intention to conduct further reflection during the summer leading to proposals for actions in the autumn.

SANTE recalled the time schedule for the adoption of the strategy (September 2020) and noted that the timing of Eurometaux's reflections might be rather late.

Eurometaux clarified that their reflections rather targeted implementation actions of what will be announced in the strategy. They informed that they had seen an early draft of the strategy and on the issues addressed therein, they would not support a standard and systematic mixture assessment factor (MAF) nor inclusion of a new hazard class for endocrine disruptors in the CLP Regulation (preferring instead to first do this in the context of the UN GHS at global level).
