**Subject:** Digital Green Certificate Verification Solution

Dear Vera,

I recently read about the European Commission's proposal for the Digital Green Certificate.

We're an Australian company with a blockchain patent in verification which can be used to prevent document fraud and fake certificates and I was hoping that we could explore opportunities to collaborate?

Here's a link to our patent which has been granted in over 90 countries including European Union, USA, Australia, Singapore and Africa: <https://patents.google.com/patent/WO2017136879A1/en>

Let me know if you think there's an opportunity for us to work together.

Regards,

[REDACTED]
