

Energy Storage

ECG 22 September 2020

Storage overview

- Study on energy storage

Storage database, 2030&2050 flexibility needs, barriers and recommendations. [See link.](#)

- European Parliament report on energy storage

Storage possibilities and recommendations to MSs and the Commission. [See link.](#)

Request for a comprehensive strategy on energy storage.

- EU initiatives

Energy System Integration Strategy, Hydrogen Strategy, Recovery Plan, Renovation Wave, Horizon Europe ...

Future actions needed?

- Ensure a level playing field and adequate economic signals for the development and deployment of energy storage.

Next steps

- Due consideration to the EP report and follow-up to the study
- Workshops:
 - Financing storage: Bankability and public support – fall 2020
 - Market/regulatory issues: CEP, markets and operators (fall 2020) + dedicated ECG meetings
 - Market/regulatory issues (Q1 2021): permitting (grid connection issues), planning and standardization
 - Adequate signals (Q1 2021): taxation (tbc), tariffs ...

Thank you
