Hola Fernando, I hope you are fine

We are working on this issue, it has been flagged by few countries.

We apologize for this

Best regards

[REDACTED] on behalf EI team.

Dear ECDC Epidemic Intelligence team,

Thank you very much for your availability and support with the issue raised by [REDACTED] and I am sorry to bother you with yet another request related with COVID outputs of the ECDC.

We have realized that the “data for the maps in support of the Council Recommendation on a coordinated approach to the restriction of free movement in response to the COVID-19 pandemic in the EU/EEA” included in the data file correspond to week 11 while the maps are for week 12. Those data are used for establishing national restrictions to travel according to agreements at EU level and we have to update those national restrictions weekly (<https://www.ecdc.europa.eu/en/covid-19/situation-updates/weekly-maps-coordinated-restriction-free-movement>)

We would appreciate if you could update the data files or address this mail to the unit in charge of doing so.

Thank you very much again for your support

Best regards

Fernando

Asunto: RE: ECDC: COVID-19 update for daily EU/EEA data as of 29 March 2021

Dear [REDACTED],

Thank you very much for your email.

Indeed, this is a recurrent issue in several regions in different countries.

In order to assure timely updates from our end, it was decided to categorise as “no data available” the regions for which data was not available at the time of ECDC data collection or for which the retro correction of cases applied lead to a negative value in a specific region. In these cases we always give an explanation as a disclaimer, as it can be seen in our [webpage](#).

There is no feasible alternative that would allow us to have a harmonised approach for all countries when dealing with the recurrent retro corrections and the lack of publicly available historic data at regional level for some of the EU/EEA countries.

We will try to contact you in the future if we experience this limitation for any of the Spanish regions, so that we can try to amend our data on time.

Please do not hesitate to come back to us should you have further questions.

Kind regards from Stockholm,

[REDACTED]

On behalf of ECDC Epidemic Intelligence team

Dear [REDACTED]

Thank you very much for the information about the sources to produce the maps.

We would like to ask you, the next time that you have any trouble with the data, to contact directly with us on the emails: alertascaes@mscbs.es and [REDACTED]@mscbs.es or myself, so we can clarify anything. The autonomous community send the data to the surveillance national system every day and they do not understand why sometimes they appear "on grey color" in the ECDC maps.

For any other question regarding the daily surveillance we are available and happy to help you

Kind regards

Asunto: RE: ECDC: COVID-19 update for daily EU/EEA data as of 29 March 2021

Dear [REDACTED]

The source we use to produce these maps is the EI data, which in the particular case of Spain is taken from the reports released by the [Ministry of Health](#).

The issue we had is that compared to previous weeks, fewer cumulative cases were reported in La Rioja during week 10. This is due to the elimination of duplicate cases from all the historic series. Therefore, case notification rates for week 2021-10 were not representative of the current situation and the maps show "rate not calculated" for La Rioja. This situation will be reverted in the new maps produced this week, when the 14-day notification rate will be possible to be calculated again.

I hope this clarifies.

Kind regards from Stockholm,

[REDACTED]

On behalf ECDC Epidemic Intelligence team.

Dear colleagues

We observe on slide number 9 that one region in Spain (La Rioja) appears without data. We would like to ask you about the source of this data. Do you use Tessy or our reports?

Thank you
