Asunto: FOR contribution - in preparation of NITAG webinar on booster doses - 20 August 2021

In preparation for the NITAG webinar on 20 August 2021 at 14H30, kindly asking for your support in the following:

- Dear colleagues,*

We did not find evidence that would provide compelling support for the use of serologic data as a surrogate for vaccine effectiveness regarding the potential need for an immunization boost. We are considering, however, that serologic assays can be informative in very specific situations, namely to evaluate the vaccine response in people under significant immune suppression.

However, we would like to have the input from the other NITAGs, as we believe that in a technical issue such as the use of serology information, it would be desirable if we could have a consistent policy between countries

Best regards,

Thank you in advance for your support and looking forward to discussions on Friday

Kind regards

EU/EEA ECDC NITAG network coordinator
