Dear Mr. Ribokas,

I very much enjoyed our exchange yesterday and look forward to stay in contact. I promised you more information on the Norway Energy Hub vision just presented by our [REDACTED] and you can find this here: <https://www.equinor.com/en/what-we-do/norway-energy-hub.html>

Please do not hesitate to get back to us should you have questions on this or any of our activities. For example Equinor has successfully piloted UN Environment World Conservation Monitoring Centre methodology on Sheringham Shoal Offshore Wind Farm and we continue to test the methodology for other assets. An ocean [observatory](#) on the seabed off Vesterålen, northern Norway, was opened in 2020. This is an expanded version from what was installed there seven years ago. As part of our continued effort to protect the critically endangered North Atlantic right whale, we have [continued to monitor](#), in real-time, the presence of whales in the Empire Wind lease area in the US by use of two real-time passive acoustic buoys.

You will find a chapter on biodiversity and oceans in our latest [Sustainability report](#).

Yours sincerely,

—
