**Subject:** Vattenfall\_request for a meeting with Sjur Jensen, VP in our Markets department

Dear Mr Vertmann,

Following our meeting on the EU ETS reform back in 2021, I am reconnecting in light of the ongoing discussion to reform the electricity markets framework. My name is [REDACTED] and I work for the Brussels office of Vattenfall in the Public & Regulatory EU department, where I am in charge of our [REDACTED] on the [REDACTED]

Vattenfall is a Swedish-based utility and one of the largest producer and retailer of electricity and heat in Europe, aiming to make fossil-free living possible within one generation. Our markets are located in Sweden, Germany, the Netherlands, the UK, France and Denmark.

In this framework, we closely follow the discussion at the EU level on power market design, both with the short term measures but also with the long term perspective, in light of the announced review of the current regulatory framework for electricity market. We are also in parallel following the work of the EU Energy Platform.

In light of current discussions already ongoing with the public consultation, Sjur Jensen, Vice President, Head of Business Unit Assets, working in our Markets department, and ourselves in the EU Public & Regulatory team, would be please to meet virtually to exchange about the upcoming reform. We could propose Monday 13/02 (8.00 to 11.30), Thursday 16/02 or Friday 17/02 (morning) but are also open to suggestion from your side.

Many thanks for your attention to our request and wishing a good continuation of the week,

Best regards

[REDACTED]
