Here it is :

Dear Sir,

Thank you for your message.

The topic “HORIZON-CL6-2022-FARM2FORK-01-01: Risk assessment of new low-risk pesticides” is expected to contribute to the risk assessment of new “so-called” low-risk substances and plant protection products. The inclusion of ds-RNA in the topic is not the result of EFSA or a European Commission classification.

Within the scope of this research and innovation action in Horizon Europe, it is mentioned ds-RNA pesticides, among others, to anticipate future risk assessment needs of different types of substances. As mentioned in the topic text: “New products may seek EU market regulatory approval; thus, proposals should consider and address relevant EU regulatory requirements and relevant guidance documents to be followed for the specific hazard characterisation and exposure assessment to achieve an appropriate risk assessment.”

Finally, we would like to inform you that the Network of National Contact Points (NCP) provides help on all aspects of Horizon 2020 and Horizon Europe in the national language. For contact details, please consult the following URL:
<https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/support/ncp>

Please contact us again if you have further questions.

Kind regards,
Research Enquiry Service - Environment Helpdesk

Subject: Question about HORIZON-CL6-2022-FARM2FORK-01-01 / Risk assessment of new low risk pesticides

Hello,

I work for [Redacted] for the protection of pollinators, and I am contacting you regarding the publication of this "Horizon Europe" call for projects for the risk assessment of new low risk pesticides (HORIZON-CL6-2022-FARM2FORK-01-01).

I would like to know why double-stranded RNA (ds-RNA) pesticides have been included in this project as a low-risk substance. Is this a result of an EFSA classification, or is it a decision of the Commission ?

Thank you for your information,

sincerely

• HORIZON-CL6-2022-FARM2FORK-01-01
Risk assessment of new low risk pesticides

Proposals should contribute to:

improve the risk assessment of newly proposed or specifically adapted low-risk pesticides such as new species/strains of microorganisms, ds-RNA-based pesticides, pheromones, plant extracts, and/or microbiome solutions or a new mode of application with the use of relevant methods;

Risk assessment of new low risk pesticides

Type d'action : HORIZON Research and Innovation Actions

Nombre d'étapes : Single stage

Date d'ouverture : 28 octobre 2021

Date de clôture : 23 février 2022 17:00
