Dear Anthony,

Great to get in contact with you and apologies for not reacting before.

Because of your business, focused on methane emissions measurement, I think that the most suitable person to meet in our Cabinet is my colleague Barbara Glowacka, in copy. Barbara is indeed in charge of the Commission methane Regulation. Incidentally, she is also following the EU-US energy relations.

Best regards,

Tatiana Marquez

Tatiana,

I hope all is well. I wanted to reach out to you and see if you are available July 14/15 while our CEO/Co-Founder (Chris Romer) is in Brussels.

We would love the opportunity to meet with you.

Best,
Anthony

Tatiana,

It is a pleasure to connect. James Watson from Eurogas shared your contact with me. Our company, Project Canary, recently became a member of Eurogas and participated in their Annual Conference and LNG meeting.

As a brief introduction, Project Canary is a climate-tech company that is focused on measuring methane emissions via high fidelity continuous monitoring technology and performing environmental assessments on emission intensive industries.

Most recently, Project Canary has been at the intersection of European gas buyers like (Uniper and Engie) through connecting them with U.S. producers to buy responsibly sourced gas.

Chris Romer, our CEO (cc'd), will be in Brussels on July 14-15 and it would be great if you had a chance to meet. A few months ago, we spoke with your colleague, [REDACTED] and hope to see him while we are in Brussels.

Do you have availability on July 14 or 15?

Best,
Anthony
