Subject: CCSA/ZEP report on CO2 transport by ship

Dear [REDACTED]

In the last year the CCSA and ZEP have worked on a report that describes the future European market for CO2 transport by ship and provides a set of recommendations.

The content of the report is now finalised and the official publication is due to take place early January. You will find attached the unformatted report, for your information.

Kind regards,

[REDACTED]

[REDACTED]
