Dear [REDACTED]

Thanks for your e-mail. We would like to meet on the issues you mentioned but our priority now is to finalise the draft strategy. This will keep us busy until Xmas. Let's touch base after.

The Observatory is indeed a Parliament project that could become permanent if the pilot goes well.

Best.

Subject: ICM Knowledge Sharing Network - ZEP Projects Network

H [REDACTED]

I would like to follow up with you regarding the announcement of the Industry Carbon Management Knowledge Sharing Network at the CCUS Forum. As you know, the ZEP is starting its own Projects Network which in fact will be launched on 24-25 January 2024 at the Porthos site in Rotterdam.

Could we set up a call to discuss the Commission's initiative and see how we can work together, avoid overlap and duplication of efforts here? Also regarding the CCS Observatory which is an EP-funded project if I understood correctly but could become permanent.

Would you have time this Wednesday (before 1400) or at the margins of the ZEP Advisory Council on 13 December?

Best wishes, [REDACTED]
