**Subject:** Thank you

Dear Aleksandra, dear Riccardo,

Thank you for taking the time to meet with me yesterday. It was great to meet you and I much appreciated our discussion on the wide range of topics related to the energy transition.

In case you are interested, the data from the Energy Outlook and Statistical Review of World Energy reports I left with you can also be accessed on line at [bp.com/energyoutlook](http://bp.com/energyoutlook) and [bp.com/statsreview](http://bp.com/statsreview). In addition, I have added you to our invitation list for the Brussels role-out events of next year's editions of both reports.

Aleksandra,

As discussed, I have attached a copy of a publicly available report from Roland Berger, which includes some data on hydrogen blending limits for different countries (pg. 12). Also attached is a paper from Hydrogen Europe that discusses the role of hydrogen and gas infrastructure.

I hope these documents are helpful and I will send you some additional information on hydrogen / CCUS projects in due course.

On a different note, I am trying to get into contact with Commissioner Kadri Simson's Cabinet, but her website does not list any Cabinet members yet. Do you happen to know any of the Commissioner's Cabinet members I could connect with?

Thank you.

With best regards,

[REDACTED]
