Subject: Meeting with the European Snacks Association (Thursday 21 October)
Attachments: ESA Position Paper - Reformulation and Product Innovation (2021).pdf; ESA Position Paper - Nutrient Profiles (2021).pdf

Dear [redacted], dear [redacted] and [redacted],

First, we would like to thank you for having accepted our meeting request to discuss the latest developments on reformulation initiatives and the establishment of nutrient profiles later this week (Thursday 21 October – 10h00/10h30). We really look forward to our exchange.

In order to have an informed discussion, we simply wanted to share with you in advance of this meeting a few considerations on which we would appreciate your perspectives (please see below). We have also attached for your information the ESA's official positions on both reformulation & product innovation and nutrient profiles.

When it comes to reformulation, we would like to understand what type of new initiatives the Commission is working on (as part of the Farm to Fork Strategy) and whether any progress have been made regarding the potential setting of maximum limits for certain nutrients in certain food categories.

On the setting of nutrient profiles, we would be interested in having more insights on the timeline (e.g. publication of the public consultation) and how practically the Commission envisages to carry this work forward, for instance in terms of selecting/identifying relevant food categories and setting thresholds?

On a more general note, we are interested in knowing how ESA can usefully contribute to this work and share relevant input, expertise and data.

Thank you,

Best regards,

[redacted]
