Subject: Flash: webinar "EU's IP strategy: Enabler or barrier?", 27 October

I participated in the webinar "EU's IP strategy: Enabler or barrier?", 27 October

The seminar was organized by the European Public Health Alliance (EPHA).

- I briefly explained the recent work of the Commission on the upcoming initiatives of interest for the audience: Pharma strategy, IP action plan and Evaluation of the supplementary protection certificate (SPC). 

- Médecins Sans Frontières (MSF):

- o Over displayed the study of MSF on the SPC claiming that SPCs over-compensate blockbusters (note: we cite this study in our SPC evaluation).

- Medicines for Europe (MfE):

- o On the SPC, MfE called for paying attention to the access aspects.
